

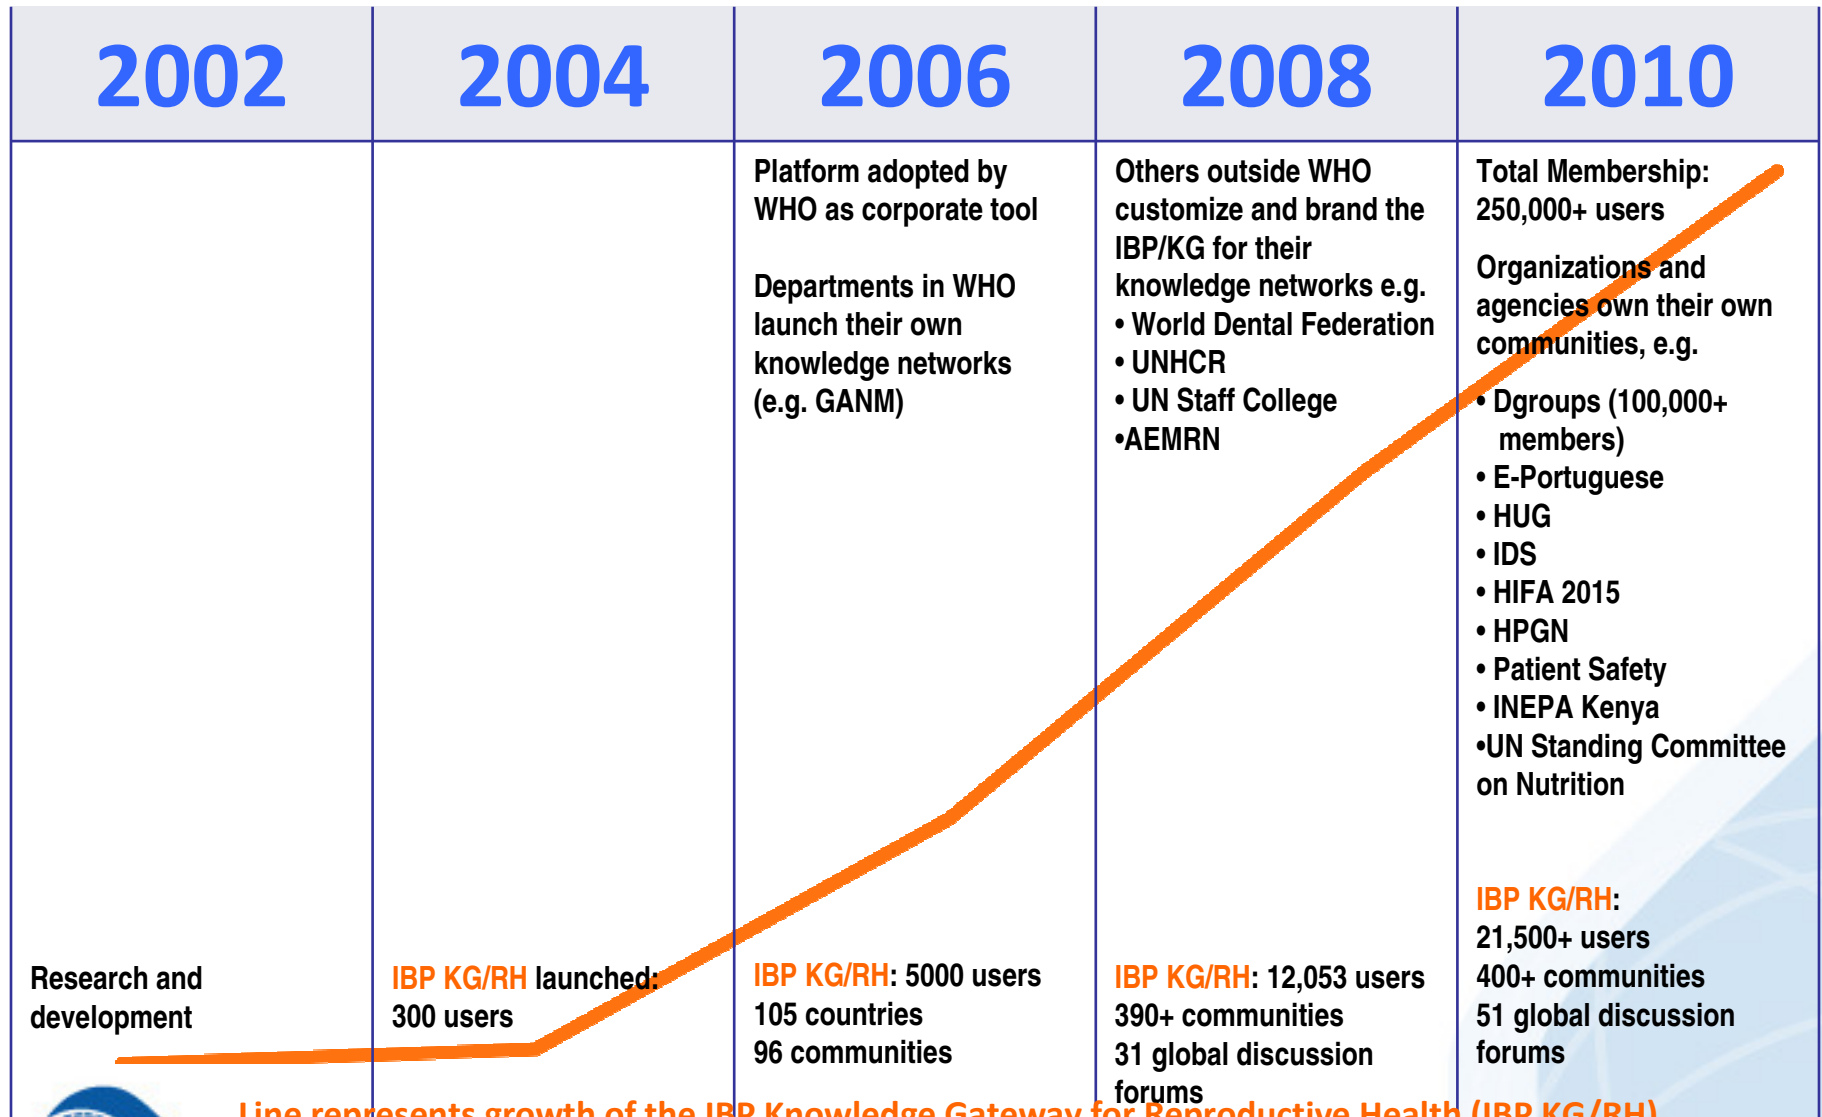

Figure 1: Growth and Development of the IBP Knowledge Gateway Reaches 300,000 users from over 200 countries and territories

Line represents growth of the IBP Knowledge Gateway for Reproductive Health (IBP KG/RH)

Implementing Best Practices in Reproductive Health

KNOWLEDGE GATEWAY For Reproductive Health

Welcome to the Implementing Best Practices (IBP) Knowledge Gateway a simple and powerful tool for virtual Communities of Practice.

IBP Knowledge Gateway for Reproductive Health is a virtual knowledge network of over 15,000 people from 195 countries supported by the partners of the Implementing Best Practices (IBP) in Reproductive Health Initiative.

Through the IBP K

Connect

to the largest online communication platform in reproductive health

Share and exchange

experiences, best practices and lessons learned

The Knowledge Gateway is an easy to use platform that connects people working around the world fields of health and development through virtual knowledge networks and communities of practice functions through email linked to virtual workshops and facilitates the sharing and exchange of knowledge, information and resource materials among countries around the world.

The Knowledge Gateway is supported by the World Health Organization, the Johns Hopkins Bloomberg School of Public Health/Center for Communication Programs, WA Research and other partners of the Implementing Best Practices (IBP) Initiative.

Welcome to Dgroups

the starting point for groups and communities in international development. We are a partnership which caters to both individuals and organisations by offering tools and services that bring people together. Whether you are supporting a team, a group, a network, an organization or a community, we aim to provide you with a platform and tools to do this in an environment which is simple, non-commercial, respectful of privacy, and targeted at low bandwidth users in the South.
